RE: Jefferson County Public Fiber Network

Dave,

As a result of the meeting held on January 6, 2005 at Millennium Digital Media's Bellevue office which was attended by representatives from NoaNet, WSU, (representing JCPFN) & myself, Millennium Digital Media is offering this Memo of Understanding expressing their intent to support and participate in the creation of a Jefferson County Public Fiber Network.

As a first step MDM's engineering team is documenting the details of their existing network and identifying serviceable areas along with those that will require additional build-out.

Millennium Digital Media looks forward to working with all the entities involved with this project and anticipates that the exact relationships and responsibilities of each partner will be defined and agreed to in the near future.

Sincerely,

David Walker
VP/GM Millennium Digital Media
NW Region
